## National Association of Home Builders Safety Awards for Excellence

The NAHB Construction Safety and Health Committee launched a national safety awards program in 2006 to recognize builders and trade contractors who have excellent construction safety programs, as well as honoring government officials and NAHB-affiliated associations who have advanced safety in the home building industry. The *Safety Award For Excellence (SAFE)* is open to all NAHB member companies, as well as NAHB-affiliated Associations, and Federal or State Plan OSHA officials who have been nominated by an NAHB member or Association. The *SAFE* program will closely examine each candidate's commitment to construction safety and health in the home building industry.
