

# COVID-19 Basic Infection Prevention Measures

COVID-19, caused by a new coronavirus, is a respiratory illness that can spread from person to person. The following infection prevention measures may help prevent transmission on construction job sites.

	<p>Stay home if you are sick. <b>DO NOT WORK.</b></p>
	<p>Wash hands frequently or provide alcohol-based hand rubs containing at least 60% alcohol.</p>
	<p>Cover coughs and sneezes.</p>
	<p>Practice social distancing — try to maintain <b>SIX</b> feet between each worker.</p>
	<p>Wear face covering (cloth, bandana, etc.) <u>or</u> mask over nose and mouth to prevent spread of virus.</p>
	<p>Reduce the size of any group at any one time to 10 people or fewer or <b>LIMIT</b> all in-person meetings.</p>
	<p>Minimize ride-sharing. While in vehicle, employees must ensure adequate ventilation.</p>
	<p>Avoid sharing tools with co-workers, if possible.</p>
	<p>Clean and disinfect frequently used tools, equipment, and frequently touched surfaces (door handles, handrails, machinery controls, cell phones, tablets) on a regular basis.</p>
	<p>If N95 respirator masks are not available, minimize dust and airborne contaminants by using engineering and work practice controls.</p>
	<p>Use proper personal protective equipment (PPE) when cleaning and disinfecting, such as gloves and eye protection.</p>
