What is Business Internet?

Business Internet delivers internet over the T-Mobile network that can replace or provide backup to your existing connection.

Break free from the hassles of traditional internet

Now you can get business-grade fixed wireless internet service from America's largest 5G network with plans starting at \$25 per month, plus taxes and fees.

Put T-Mobile Business Internet to work for your business

What can you do with it?

- **Use as primary connectivity for small franchises**, satellite offices, point of sale systems, and more.
- **Add failover protection to help** ensure critical business applications remain online.
- **Offload traffic from existing constrained connections** that are not performing as expected.
- **Deliver separate, reliable business connectivity** for at-home workers.

Who is it for?

- **Companies needing primary connectivity** for small locations.
- **Any business that is searching for a reliable backup solution** to maximize uptime for key locations and applications.
- **Businesses with connectivity** unable to keep up with growing data consumption and want a cost-effective means to add bandwidth.
- **Companies with nationwide connectivity needs** and want to move away from managing multiple regional ISPs.

What does it cost?

- **Nationwide plans available** for as little as \$25/month, plus taxes and fees.
- **Unlimited data for \$50/month**, plus taxes and fees (subject to availability).

The benefits of T-Mobile Business Internet include:

- **Nationwide solution** to address your connectivity needs across the country.
- **Use your own compatible router** or take advantage of a T-Mobile provided device.
- **Easy setup**—self-install options to get up and running in 15 minutes.
- **Exceptional customer support** from our dedicated Team of Experts, 24/7.
