

# Student Chapter Membership

## NAHB Trial 2021-22 Dues for Secondary Programs:

**\$200/school allows unlimited student members to join your chapter or opt to pay \$5/student member**

### Student Member Highlights

- **Student Competition** – Work with your local home builders association and builder members to plan and coordinate a local competition. Or engage nationally, where students get a real-life residential construction experience. Demonstrate problem-solving skills by preparing a solution that includes working drawings, a labor and materials estimate, and a construction schedule. Architecture and Construction Management competition tracks available. [nahb.org/competition](http://nahb.org/competition)
- **Careers in Construction Month** – October is the official month for celebrating all careers in construction. Join other student chapters across the country for this social media takeover. Flex your construction projects and club activities on TikTok, IG, and Facebook.
- **Career Networking** – Build a relationship with local industry professionals year round through your local Home Builders Association (HBA). Connect with students and construction companies across the country at the annual International Builders' Show (IBS) and NAHB exclusive programming.
- **International Builders' Show** - Student members save a ton on IBS registration and every Student Chapter is eligible for travel scholarships. At IBS tour the New American Home and walk the show floor and visit hundreds of company booths showing off their latest innovations.
- **Discover the value of membership**
