Dust Removal Systems

CUSTOMERS HAVE OPTIONS

1 Table 1 engineering control method as specified in 29 CFR 1926.1153. Core drills under Table 1 (x) “rig mounted core drills” are compliant when stand mounted and used with a water delivery system. 2 still requires a core drill as well being a Table 1 “tool shift”, and therefore OD-110 and OD-120 and other handheld core drills are compliant when used with a different dust collection system. As of June, 2017

Products — Find your tool and accessory below, and then use with any Hilti vacuum. Note that certain solutions have a CFM requirement noted under the tool nomenclature.
